PROFILE

Full Stack Developer with practical experience building web and desktop platforms using React, TypeScript, FastAPI, Django, and PostgreSQL. Focused on converting operational workflows into clear software solutions with strong collaboration, clean API design, and containerized deployment using Docker and Nginx.

EXPERIENCE

AITTC, UM6P

Full Stack Developer Intern

Oct 2025 – Apr 2026

Benguerir, Morocco

- Building a web platform to digitize farm operations and experimental data in one system.
- Delivered **3 role-based workflows** (Manager, Technician, Scientist/Visitor) to structure daily operations and access.
- Participated in **weekly stakeholder meetings** to convert business requirements into technical features.
- Designed a containerized architecture with Docker Compose, Nginx, Django REST Framework, and PostgreSQL.
- Implemented core backend APIs and data modules to centralize operational and experiment records.

Key System

Freelance Web Developer

Feb 2025 – Apr 2025

Casablanca, Morocco

- Designed and developed a company website for a hardware business to improve online visibility and product presentation.
- Built responsive pages and structured product/service content for clear customer navigation across desktop and mobile.
- Delivered a maintainable front-end codebase and coordinated directly with the client on updates and final deployment.

PROJECTS

Vita | FastAPI, Next.js, Electron, PostgreSQL, Docker

- Developed a desktop-first digital activity tracking and productivity insights platform.
- Built a FastAPI backend (SQLAlchemy, Pydantic, JWT auth) synced to an Electron background collector and Next.js web dashboard.

ePong | Three.js, Django, WebSockets, PostgreSQL, Docker

- Built a real-time 3D multiplayer Pong platform with AI, local/remote PvP, and tournament modes.
- Implemented real-time gameplay communication using WebSockets (Django Channels) and PostgreSQL data persistence.

auTask | React, TypeScript, APIs, Authentication

- Developed a responsive task management web app with reusable components and authentication workflows.
- Integrated external APIs to provide contextual features such as weather and location-based information.

42 Core Projects (Minishell, CUB3D, Webserv, Inception) | C/C++, Unix, Networking, Docker

- Realized a Unix shell, a raycasting 3D engine, an HTTP server, and containerized infrastructure.
- Applied low-level concepts: memory management, process control, sockets, and system architecture.

EDUCATION

1337 – UM6P

Software Engineering Program (42 Network)

2022 – Present

Benguerir, Morocco

Faculty of Science and Technology

University Studies in Science and Technology

2019 – 2021

Morocco

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Frontend: React, Next.js, Electron, Three.js, HTML, CSS, Tailwind CSS, Vite

Backend: FastAPI, Django, Django REST Framework, Node.js, WebSockets, Django Channels

Databases: PostgreSQL, Redis

DevOps & Tools: Docker, Docker Compose, Nginx, Linux, Git, GitHub

SOFT SKILLS

Problem-Solving | Teamwork | Communication | Adaptability | Continuous Learning | Autonomy | Time Management
